7

CPR

Start a cycle of CPR:

2 breaths + 30 compressions, 5 times.

Help them breathe until the Nyxoid starts working
(2 to 5 minutes).

7

CPR

Start a cycle of CPR:

2 breaths + 30 compressions, 5 times.

Help them breathe until the Nyxoid starts working
(2 to 5 minutes).

Repeat step 6 and 7 using a new Nyxoid and the
opposite nostril each time, until the person responds
or Paramedics arrive.

It is always safe to give additional doses of Nyxoid.
If you have no more Nyxoid, continue CPR.

Repeat step 6 and 7 using a new Nyxoid and the
opposite nostril each time, until the person responds
or Paramedics arrive.

It is always safe to give additional doses of Nyxoid.
If you have no more Nyxoid, continue CPR.
